CARDIOCLOUD / TECHNICAL ARCHITECTURE

What actually ran on AWS.

eu-west-3 · One-AZ demonstration · Application and guardian Terraform roots · Removed after validation

MODEL DELIVERY

Local RTX 4060 training. CodeBuild builds outside the private VPC. Serving uses the verified S3 artifact and ECR image.

IAM — Scoped service roles

CloudWatch — Logs and alarms

CloudTrail — API audit trail

Flow Logs — Network telemetry

EventBridge — Minute guardian sweep

INDEPENDENT CUTOFF — SDK Step Functions watchdog + guardian Lambda + expiry + scoped teardown audit

Solid: logical request/data flow. Dashed: artifact or metadata association. Sources and operational limitations are in README.md.
